

Icron Technologies

Introducing the World's Only USB 3.1 Web Conferencing Extender System over CAT 6a/7!

Web conferencing helps companies achieve success by allowing video sessions with anyone, anywhere, anytime! Unfortunately, integrators are often frustrated by installation challenges within the huddle/conference room where standard USB cables are not long enough and USB 3.1 extenders have been unreliable. Finally, with the launch of Icron's USB 3-2-1 Raven™, there is a web conferencing extension solution that actually works!

World's first and only
USB 3.1 extender system
over copper

Validated performance with
all major web conferencing
applications

Interoperability with cameras,
docking stations and video
over USB devices

Simultaneous backward
compatibility with USB 3.1,
2.0 or 1.1 devices

Extend up to 100m over single
CAT 6a/7 cable or up to 200m
over multimode fiber

Compatible with all major
operating systems: Windows®,
macOS™, Linux® and Chrome OS™

Highly reliable and backed
by Icron's 2-year warranty

True plug-and-play; no need
for additional software drivers

Patented ExtremeUSB-C™
technology

Extending Web Conferencing Systems

Icron's USB 3-2-1 Raven™ series extends USB 3.1 web conferencing systems and other USB peripherals simultaneously up to 100 meters over CAT 6a/7 cable or up to 200 meters over OM3 fiber. Choose the model that best suits your needs; both are validated with major conferencing software applications such as Adobe Connect, BlueJeans, Cisco WebEx, Google Hangouts, Go-To-Meeting, Skype for Business, Vidyo and Zoom.

USB 3-2-1 Raven™ 3104
4-Port USB 3.1, 100m CAT 6a/7 Point-to-Point Extender System

USB 3-2-1 Raven™ 3124
4-Port USB 3.1, 200m Multimode Fiber Point-to-Point Extender System
